Pregnancy Half Way Point: What to Expect at Your 20 Week Appointment. This midpoint appointment because you'll likely do an ultrasound in addition to your regular checkup. Be sure to pay attention to your pre-appointment instructions. Types of prenatal ultrasound scans your provider may order include:

- **Fetal Survey at 20 weeks**: This “anatomy scan” looks at the baby from head to toe.

**CGMFM** is accredited by the American Institute in Ultrasound Medicine (AIUM) in fetal echocardiography.

- **3D rendering of a second trimester fetus at 20 weeks**.

Use the information in this guide to help you and your baby thrive. We are here to support you.

**WEEK 15–16**.
- **Blood screening tests.**
- **Schedule ultrasound.**

**WEEK 20**.
- **Schedule sonogram for evaluation of fetal anatomy (may find out gender).**

- **May be taken in our office between 15-20 weeks** that can detect up to 80% of genetic abnormalities if you are over 20 weeks of pregnancy, and think you are having Down syndrome. If there is no NCD, National Coverage Manual or regional LCD/Article, states, “Three-dimensional ultrasound appears to have been useful in research on fetal structure in (2011) prenatal diagnosis of central nervous system (CNS) anomalies by weeks’ gestation, and their volume data sets were uploaded onto a centralized file.”

- **Placenta praevia** is graded by ultrasound findings as: due to past history of, for example, endometritis, manual removal of placenta, curettage. This may be low at the 20-week scan but ‘apparent’ migration occurs during the second trimester.

I had a low-lying placenta at the 20 weeks scan. Was given Low lying placenta, but no special instructions or anything I needed to do or avoid etc. The Dr just.

Find out more about what to expect at your 20 week scan here. Browse each week of the week by week guide using the links on the left, or visit our pregnancy web resources.

- **Ultrasound: What type of obstetrical? nuchal, 20 week, biophysical profile, etc.**

Please remember to provide the patient with any preparation instructions.

**Computed Tomography (CT Scan).**
- **Brain / Head OB Ultrasound:** Follow pelvic prep instructions for up to 20 weeks gestation. After 20 weeks gestation, drink.

We have prepared the following instructions and tips to help keep you safe and comfortable during the ultrasound procedure.

An ultrasound is routinely ordered at approximately 20 weeks of pregnancy.

**Gestational Hypertension**—High blood pressure that develops after week 20 in pregnancy and order blood tests, perform an ultrasound scan to check your baby’s growth, and use a non-stress test to check your baby’s heart rate.

Follow your doctor’s instruction about diet and exercise.
